Rapid Response-Third Generation (R2-3G) Contract

The R2-3G Contract

R2-3G (Rapid Response-Third Generation) is the new U.S. Army CECOM contracting vehicle. This \$16.4 billion, five-year contract is the follow-up to the previous CECOM Rapid Response (CR2) acquisition program.

The R2-3G program further streamlines the acquisition process for U.S. Military and other Federal agencies by offering:

- 19-day, competitive award process.
- Performance-based, Indefinite Delivery/Indefinite Quantity (IDIQ) contract
- Access to pre-qualified, "best in class" contractors.
- Flexible Time & Material (T&M), Cost Reimbursable (CR) and Firm Fixed Price (FFP) task orders.
- Online requirement registration
- 24/7 access to web-enabled database to monitor task order status.
- Low administrative support cost.

The ARINC Team

ARINC is one of 17 prime contractors selected for the R2-3G contract. Reliance Aerotech Services is an approved member of the ARINC R2-3G Team, a group of 63 qualified subcontractors that share the ARINC commitment to deliver world leading communications, engineering and integration solutions for customers in the defense and government industries. A contractor on the original CR2 contract vehicle, ARINC has won more than \$3 billion in defense work. Reliance Aerotech Services is a small business and qualified to work with other teammates to meet small business requirements within the R2-3G contract.

Performance Work Statement (PWS) Task Areas

Reliance Aerotech Services has the experience and expertise to deliver on a broad range of task areas within the scope of the R2-3G PWS including:

- Technology Insertion, Systems Integration and Systems Engineering
- Installation
- Operation, Maintenance and Repair
- Integrated Logistics Support
- Painting, Coating, Sealing and Preservation
- Customer Assistance & Technical Support
- Depot Maintenance Program

A Team Reliance™ Company

DEPENDABLE AVIATION SOLUTIONS

Why Reliance Aerotech Services

Reliance Aerotech Services has a proven track record delivering aviation staffing, logistics and more than 600 aircraft systems integration and modification solutions for fixed and rotor wing aircraft in the military and government aviation sectors. From major avionics and structural upgrades to weapons and electrical systems, our expert personnel ensure program milestones are met, contract requirements are satisfied and all regulatory issues are fully complied with.

Select government and military integrations & modifications include:

- ARC-231 SATCOM
- Forward Looking Infra Red Integration (FLIR)
- Air Warrior MCCA
- SAFIRE II FLIR Upgrade
- APX-118 Common Transponder
- ARC-220 HF Radio
- Full Authority Digital Engine Control (FADEC)
- I/R Strobe
- UH-60 Health, Usage & Monitoring System (HUMS)
- Desert HUMS
- Blue Force Tracker (BFT/EDM)
- MAVIN Cabin Heat
- Pegasus IAS-E
- CH-47 Common Missile Warning System (ALE-47)
- ALE-47 Countermeasures Dispensing System
- Aircraft Wireless Intercom System (AWIS)
- Fast Rope Insertion and Extraction System (FRIES)
- Huey UH-1H-II Conversion

Reliance Aerotech Services is a small business concern.

Reliance Aerotech Services' R2-3G Capabilities

Reliance Aerotech Services is ready to deliver a broad range of R2-3G capabilities including:

- Aircraft MX, inspection, and repair
- Aircraft turbine MX, inspection, repair and overhaul
- Depot level overhaul of aircraft structural components
- Depot level overhaul of aircraft mechanical components
- Depot level overhaul of aircraft avionics components
- Installation of aircraft mods (including STC)
- Aircraft launch and recovery
- Aircraft ground support equipment MX support
- Aircraft supply, logistics, and admin tasks
- Aerospace engineering projects
- Project planning and program management
